

**A****B**

2B - summarize using box plot, #of cancer types/IncRNA, highlight a few examples that are cancer specific, only significant in one cancer type and those significant in multiple cancer types.  
How many associated with worse prognosis compared to better prognosis  
Correlation of IncRNAs with each other → show we need to select best ones from highly correlated groups of IncRNAs

**C****D****E****F**

Distribution of individual IncRNA candidates with median-cindex compared to clinical variables.
